

NightWatchman®

Delivering immediate energy and cost savings that you can bank on

NightWatchman® intelligently power manages computers across your network remotely and automatically overnight, on weekends and when not in use. This significantly lowers both energy consumption and CO₂ emissions without ever impacting user productivity. NightWatchman is the market leading and most comprehensive PC power management solution available today.

*"By working together with 1E's **best-of-breed** energy efficient IT solutions, we offer customers a powerful combination of automation, reduced infrastructure and power management. As a result, customers can gain a deeper insight into their operations and drive efficiencies across their physical and virtual IT environments."*

Brad Anderson, Corporate VP, Microsoft Corporation

Case Studies

HSBC deployed NightWatchman across 300,000 PCs, saving over \$1m in energy costs and reducing CO₂ by 3m kg in just one year

Dell implemented NightWatchman on 50,000 computers, achieving a 40% reduction in energy consumption and repeatable cash savings of \$1.8m per year on electricity

Enterprise Ready

- Round-the-clock power management immediately lowers energy costs and cuts CO₂ emissions
- PC and Mac power management, without disruption, across your whole organization
- Intuitive, customizable senior management reporting through the Enterprise View dashboard
- Intelligent scheduling, end user opt-out and document back up to fully empower your users

Unsurpassed Accuracy

- Uses actual machine make and model power consumption to deliver highly accurate web-based reporting
- Applies local energy tariffs to reveal the true picture of energy use, carbon emissions and costs by department, building or region
- Detailed, trusted and independently verified information that supports legislative reporting and energy saving rebate schemes
- In-depth behavior-based reporting enables continual optimization of savings

Robust and Proven

- Average energy savings of \$36 per PC per year to offset costs in 12 months or less
- 4.5 million licenses successfully deployed across both public and private sector organizations worldwide
- Making a global impact; \$530m in energy savings, CO₂ emissions cut by 4.3 million tons
- The most scalable power management solution available on the market today; our largest customers have in excess of 300,000 clients

Customers

Our NightWatchman customers include:

IT & Telecoms

AT&T
CSC
Dell
Verizon Wireless

Finance

National City Corporation
OneBeacon Insurance
Schroder Investment Management
Aviva

Government

Department of Veterans Affairs
State of West Virginia
Westchester County

Healthcare

Johns Hopkins Hospital

Manufacturing

Ford Motor Company
Parker Hannifin
Sasol North America
National Instruments

"We achieved 33 percent energy savings on laptops and 50 percent savings on desktops, which has equated to savings of between \$40 and \$50 per machine per year." **Eric Morrison, National Instruments**

Case Study

Verizon Wireless deployed NightWatchman and WakeUp across 63,000 managed machines, saving \$1.3 million per year with no compromise on performance

"In the past as many as 60 percent of Ford's PC users haven't shut their PCs off at the end of the day, resulting in wasted energy. Going forward, we'll be able to manage PC power consumption more efficiently while minimizing disruptions during the working day." **Keith Forte, Ford Motor Company**

Do you need to immediately reduce energy costs and CO2 emissions without disrupting your users?

Do you want to report accurately on real data, not assumptions and averages, to deliver million-dollar savings?

Then act now with NightWatchman and make a truly global impact!

1E – Empowering Efficient IT

We believe every one of our customers should expect more from their IT. Founded in 1997, 1E pioneered advanced PC power management with the release of ground-breaking solutions like NightWatchman® and WakeUp™. That innovative approach has continued with the development of revolutionary concepts like Useful Work™, Drowsy Server® and Computer Health™ as part of a unique range of industry-leading solutions. Headquartered in London and New York and with nearly 14 million licenses deployed world-wide, over 1100 organizations in 42 countries have trusted us to help them to work effectively, productively and sustainably. To date, we have helped our customers save in excess of \$530m in energy costs alone, cutting CO2 emissions by 4.3 million tons. We have many imitators, but there is only one 1E.
