WakeUp™

Maximize user productivity with healthy and available PCs

WakeUp™ makes sure that every PC is available and ready to be patched day or night, reducing the burden of administrator support, while dynamically maintaining Computer Health™ to ensure that your users always remain productive. WakeUp enables rapid 100% patch and software distribution success while delivering the best possible user experience from a healthy and up-to-date machine.

WakeUp™ delivers consistency and control to over 5 million licensed users. One of our first customers still uses WakeUp to turn on 36,000 PCs in under two minutes each morning

Case Study

Eye care specialist **Vision Service Plan** implemented WakeUp™ to deliver an improvement in their software distribution success rate from 75% to nearly 95% and savings of $45,000 over the first six months

Do your users frequently complain that their PCs are unresponsive or slow?

Do you need to proactively maintain the health of every computer on your network to reduce downtime?

Do you need to rapidly deploy patches across your network out-of-hours, without user disruption?

"We can now maintain software both locally and remotely, on servers, desktops and laptops, resulting in a 30 to 40 per cent reduction in the number of support-desk calls concerning applications not working. As a result, the IT team can concentrate on other work, in the knowledge that routine maintenance is being taken care of." **Roger Chappé, SAB Miller**

Advantages

- **Automatically wake and patch every machine**
  Instantly powers on and patches PCs out of hours, cutting patch times and improving administration

- **Maximize user productivity**
  Computer Health™ proactively health checks and heals PCs, identifying issues and automatically remedying them

- **Guarantee deployment success**
  Delivers 100% patch and software distribution success across every machine in the network

- **Simplify systems administration**
  Integrates with existing systems management software or operates using its own management console

- **Support secure environments**
  Common Criteria certified - the only solution available to support reliable wakeup for PCs on 802.1x VLANs

Customers

Our WakeUp customers include:

Finance
ING Investment Management
OneBeacon
Schroder Investment Management
Nomura

Government
US Airforce on behalf of the Pentagon
US Army

IT & Communications
BSkyB
Dell
Verizon Wireless

Manufacturing
Ford Motor Company
Sasol North America
Harsco Corporation
Sony
SABMiller
Nestlé

Healthcare
Harris County Hospital District
Johns Hopkins Hospital

Education
University of Southern Denmark
Liverpool Johns Moores University

"A typical IT group supporting 250 users is likely to spend two to four hours a week just keeping desktops compliant with security patches and software updates. User support consumes the vast majority of IT staff time, often as much as two full-time staffers." **Mary Johnston Turner, Ovum**

"The 1E products we're using have been absolutely reliable - patch management now has a 100 per cent success rate and our bills are coming down." **Erling Brandt Kjeldsen, University of Southern Denmark**

Benefits

Reduces the cost of software and patch deployments by enabling 100% distribution success, delivering a return on investment in under 12 months

Cuts patch times from weeks or days to hours and minutes and provides the ability to manage computers on and off the network

Delivers complete visibility of the network through customizable reporting on patch deployment success and health issues to minimize user disruption

Boosts productivity by improving the health of your machines so your users experience much less disruption

Proven and reliable scalability from just 500 seats to over 300,000

Seamlessly integrates with ConfigMgr 2007 and NightWatchman to deliver comprehensive round the clock power and patch management

Empowers users through Web WakeUp, which allows employees to wake up their PCs remotely to continue to work or to find important data

Enhances security by ensuring PCs are always available for critical patches to be deployed immediately, whether those PCs are on or off

1E – Empowering Efficient IT

We believe every one of our customers should expect more from their IT. Founded in 1997, 1E pioneered advanced PC power management with the release of ground-breaking solutions like NightWatchman® and WakeUp™. That innovative approach has continued with the development of revolutionary concepts like Useful Work™, Drowsy Server® and Computer Health™ as part of a unique range of industry-leading solutions. Headquartered in London and New York and with nearly 16 million licenses deployed world-wide, over 1,400 organizations in 42 countries have trusted us to help them to work effectively, productively and sustainably. To date, we have helped our customers save in excess of $550m in energy costs alone, cutting CO_2 emissions by 4.5 million tons. We have many imitators, but there is only one 1E.
